# Case Study – Car Connect System

**Submitted By-**

**Aniroop Gupta, Python Batch 1**

**Harish ER, Python Batch 1**

**Subrat Shukla, Python Batch 1**

**Key Functionalities:**

## User Authentication:

- Secure user authentication and authorization mechanisms.

## Vehicle Management:

- CRUD operations for vehicles, including details such as model, make, availability, and pricing.

## Reservation System:

- Real-time reservation handling with conflict resolution.
- Email/SMS notifications for reservation confirmation and reminders.

## Reporting:

- Generation of reports for administrators, including reservation history, vehicle utilization, and revenue.

_____

## SQL Tables:

1. Customer Table
2. Vehicle Table
3. Reservation Table
4. Admin Table

```sql
-- Customer Table
CREATE TABLE Customer (
    -- Auto-incrementing unique ID for each customer
    FirstName NVARCHAR(50) NOT NULL,
    LastName NVARCHAR(50) NOT NULL,
    Email NVARCHAR(100) NOT NULL UNIQUE,
    PhoneNumber NVARCHAR(15) NOT NULL,
    Address NVARCHAR(255) NOT NULL,
    Username NVARCHAR(50) NOT NULL UNIQUE,  -- Unique username for login
    Password NVARCHAR(255) NOT NULL,  -- Securely hashed password
    RegistrationDate DATETIME NOT NULL DEFAULT GETDATE()  -- Default to the current date and time
);
```

**Project Structure:**

**E-R Diagram-**

# Implementation Of Car Connect System-

## 1. Customer Service Section-

**Registering a new customer in database-**

```
select * from Customer;
```
100 %

Results | Messages

| | FirstName | LastName | Email | PhoneNumber | Address | Username | Password | RegistrationDate | CustomerID |
|---|---|---|---|---|---|---|---|---|---|
| 1 | Subrat | Shukla | subrat@email.com | 9928211389 | Jaipur | shubh17 | 12345678 | 2024-10-13 00:00:00.000 | 1 |

## Getting Customer Details by ID-

```
Customer Service:
1. Get Customer by ID
2. Get Customer by Username
3. Register a new Customer
4. Update Customer information
5. Delete a Customer
0. Exit
Enter your choice (0-5): 1
Enter customer ID to get: 1

Customer Data: ('Subrat', 'Shukla', 'subrat@email.com', '9928211389', 'Jaipur', 'shubh17', '12345678', datetime.datetime(2024, 10, 13, 0, 0), 1)
```

## Getting Customer Details by Username-

```
Customer Service:
1. Get Customer by ID
2. Get Customer by Username
3. Register a new Customer
4. Update Customer information
5. Delete a Customer
0. Exit
Enter your choice (0-5): 2
Enter username to get customer data: shubh17

Customer Data: {'CustomerID': 1, 'Password': '12345678'}
```

## Updating Customer Details-

```
Customer Service:
1. Get Customer by ID
2. Get Customer by Username
3. Register a new Customer
4. Update Customer information
5. Delete a Customer
0. Exit
Enter your choice (0-5): 4
Enter customer ID to update: 1
Enter updated first name: Aniroop
Enter updated last name: Gupta
Enter updated email: aniroop@email.com
Enter updated phone number: 9876543210
Enter updated address: Kanpur
Enter updated username: aniroop10
Enter updated password: 87654321
Enter updated registration date (YYYY-MM-DD): 2024-10-14
Customer updated successfully.
```

```
select * from Customer;
```
100 %

▦ Results  ▤ Messages

| | FirstName | LastName | Email | PhoneNumber | Address | Username | Password | RegistrationDate | CustomerID |
|---|---|---|---|---|---|---|---|---|---|
| 1 | Aniroop | Gupta | aniroop@email.com | 9876543210 | Kanpur | aniroop10 | 87654321 | 2024-10-14 00:00:00.000 | 1 |

**Deleting a customer from database-**

```
Customer Service:
1. Get Customer by ID
2. Get Customer by Username
3. Register a new Customer
4. Update Customer information
5. Delete a Customer
0. Exit
Enter your choice (0-5): 5
Enter customer ID to delete: 1
Customer with ID 1 deleted successfully.
```

```
select * from Customer;
```
100 %

▦ Results  ▤ Messages

| FirstName | LastName | Email | PhoneNumber | Address | Username | Password | RegistrationDate | CustomerID |
|---|---|---|---|---|---|---|---|---|

**Exiting from Customer Service Section and returning to main menu-**

```
Customer Service:
1. Get Customer by ID
2. Get Customer by Username
3. Register a new Customer
4. Update Customer information
5. Delete a Customer
0. Exit
Enter your choice (0-5): 0
Main Menu:
1. Customer Service
2. Vehicle Service
3. Reservation Service
4. Admin Service
5. Authentication Service
6. Report Generation
0. Exit
```

## 2. Vehicle Service Section-

**Adding new vehicle in the database-**

```
Enter your choice (0-6): 2
Vehicle Service:
1. Get Vehicle by ID
2. Get Available Vehicles
3. Add Vehicle
4. Update Vehicle
5. Remove Vehicle
0. Exit
Enter your choice (0-5): 3
Enter model: 3XO
Enter make: Jaipur
Enter year: 2024
Enter color: Red
Enter registration number: 8732
Enter daily rate: 800000
Vehicle added successfully.
```

```
select * from Vehicle;
```

100 %

**Getting vehicle by Id-**

```
Vehicle Service:
1. Get Vehicle by ID
2. Get Available Vehicles
3. Add Vehicle
4. Update Vehicle
5. Remove Vehicle
0. Exit
Enter your choice (0-5): 1
Enter vehicle ID to get: 1

Vehicle Data: (1, '3XO', 'Jaipur', 2024, 'Red', '8732', True, Decimal('800000.00'))
```

**Getting available vehicle details-**

```
Vehicle Service:
1. Get Vehicle by ID
2. Get Available Vehicles
3. Add Vehicle
4. Update Vehicle
5. Remove Vehicle
0. Exit
Enter your choice (0-5): 2

Available Vehicles:
(1, '3X0', 'Jaipur', 2024, 'Red', '8732', True, Decimal('800000.00'))
```

**Updating vehicle information-**

```
Vehicle Service:
1. Get Vehicle by ID
2. Get Available Vehicles
3. Add Vehicle
4. Update Vehicle
5. Remove Vehicle
0. Exit
Enter your choice (0-5): 4
Enter vehicle ID to update: 1
Enter updated model: BMW
Enter updated make: Delhi
Enter updated year: 2025
Enter updated color: White
Enter updated registration number: 9928
Enter updated daily rate: 6000000
Vehicle updated successfully.
```

**Removing vehicle-**

```
Vehicle Service:
1. Get Vehicle by ID
2. Get Available Vehicles
3. Add Vehicle
4. Update Vehicle
5. Remove Vehicle
0. Exit
Enter your choice (0-5): 5
Enter vehicle ID to delete: 1
Vehicle removed successfully.
```
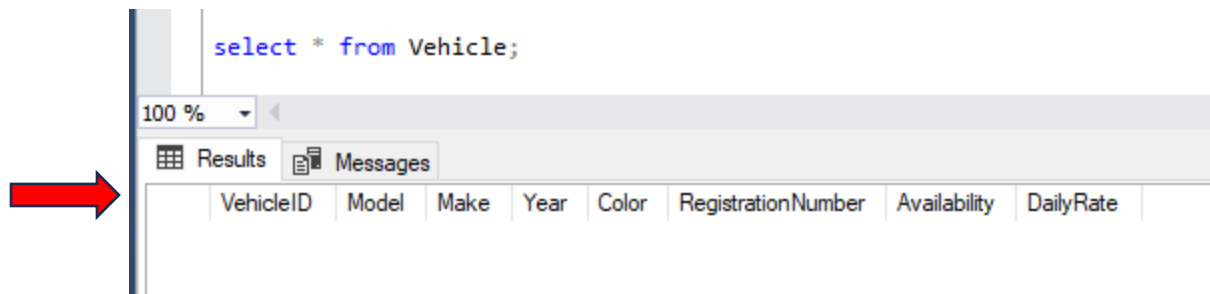

```
select * from Vehicle;
```
